Hepasil DTX™ Comprehensive liver-support formula featuring the InCelligence™ Detox-Support Complex

A healthy lifestyle coupled with a supplement such as USANA's Hepasil DTX with the unique InCelligence Detox-Support Complex is a great way to maintain healthy liver function and balance the body's natural detoxification processes.*

THE BENEFITS OF HEPASIL DTX

Your liver performs a number of functions vital to maintaining good health, including filtering virtually everything that goes into your blood stream. Almost every nutrient you put into your mouth—from food, drinks, medications, and supplements—goes through your liver, where it is broken down into a form that can be used by your body or be filtered out and eliminated.*

Enhanced with USANA InCelligence Technology™, Hepasil DTX supports healthy liver function in many ways, including supplying the body with nutrients that promote the natural detoxification process as well as endogenous antioxidant activity.*

THE SCIENCE BEHIND HEPASIL DTX

A key ingredient in Hepasil DTX, choline helps the liver metabolize fats and cholesterol and move them out of the liver. Upon entry into the cell, choline is oxidized to become betaine, which plays a role in donating methyl groups necessary for detoxification reactions.

The liver uses biotin to support metabolism of macronutrients and the synthesis of glycogen for energy. In addition to alpha-lipoic acid and n-acetyl l-cysteine, the InCelligence Detox-Support Complex in Hepasil DTX also delivers a comprehensive array of phytochemicals, including green-tea extract, milk-thistle extract, broccoli concentrate, and USANA's patented Olivol®. These powerful nutrients target a cell-signaling pathway that supports naturally protective processes within a healthy liver:

- Balancing detoxification reactions by stimulating the production of Phase II detoxification enzymes, including glutathione-S-transferases, these enzymes link with the highly reactive intermediary metabolites generated in the liver during Phase I and convert them into a form that can be excreted from the body.
- Defending against oxidative stress caused by free radicals generated during Phase I by acting as direct antioxidants and also activating the production of the body's endogenous antioxidants, including glutathione, which is most concentrated in the liver.

Taking three tablets of Hepasil DTX a day for 28 days can help significantly increase natural glutathione production and overall antioxidant capacity. In fact, the formula is patent pending because of the increase in glutathione, vitamin C antioxidant capacity, and detoxification activity it helps produce within the body.*

THE USANA DIFFERENCE

Hepasil DTX has two patents pending: one for the formula's effectiveness and a second because it safely combines previously incompatible but equally important nutrients into one bi-layered tablet using USANA's Nutritional Hybrid Technology. This technology enables USANA to manufacture a truly unique, comprehensive liver-support supplement. The InCelligence Detox-Support Complex unlocks the innate intelligence of your body's natural processes to help support the longevity of your liver cells and protect your health from an increasingly toxic world.*
